

Allen 38mm Double High Tension Block with Fixed Head

 allen

38mm Double high tension block with fixed head.

The Allen high tension stainless steel block range is specifically intended for use where wire, dyneema and spectra lines are loaded under high tension.

The entire block is engineered using 316 stainless steel and the inner ball race sheave is CNC machined from solid giving unfailing results every time.

Part	Description	Sheave Dia mm	Length mm	Line Dia. mm	Shackle Pin mm	Break Load Kg.	Weight gm
