

Allen 20mm Dynamic Bearing Quad Organiser

20mm Dynamic Bearing Quad Organiser

The Allen DB deck organiser range is available in 20, 30 and 40mm sheave sizes. All feature two lightweight aluminium cheeks, four dynamic bearing sheaves, a becket and nuts and bolts.

Easily stacked and with four sheaves and one becket, the DB deck organisers allow for a wide range of rigging options. When stacked the upper organiser is rated to two-thirds of the max working and breaking load. The becket can also be used as a plain bearing sheave, ideal for higher loading static lines.

Examples Of Use

- Guiding halyards along a coach roof back to clutches, cleats and winches
- Diverting control lines around a corner under or over deck
- Underdeck take-up systems
- Redirecting a halyard, sheet or control line to have the correct lead angle into a winch or cleat

Features

- Four dynamic bearing sheaves
- Lightweight and easy to install
- Stackable
- Suitable for boats up to 28ft
- Stylish and sleek design
